Project: Turn 200+ damaged and lost plaques into one elegant and important installation.

Solution: For this solution we utilized a large sculpture in our client's second floor main atrium. We added two etched stainless steel plaques, each measuring 3½' wide x 6½' tall. The stainless plaques were trimmed in a dark green border to draw attention to them. What makes this installation so very effective is the sheer size and scope of the etched pieces and the surrounding scale of the sculpture.

This project is now a centerpiece for visitors and staff alike.
